Motorcycle handlebar lengthening 'largo' – „big buddy“ of handlebar ends

D-Breisach, 02nd July 2018 Those, who consider an enlargement of their motorcycle handlebar in order to gain more width for the seating position or to mount additional accessories, will now indulge these desires by the tube broadening of the South German manufacturer ABM.

The handlebar extension 'largo' allows a lengthening of the torque tube of 30 mm on each side (60 mm in total). The additional length can be applied perfectly for mounting bar end mirrors or for moving parts within the handlebar area, for instance.

The set of handlebar lengthening is made of aluminium and can simply used instead of handlebar ends. The universal extension parts are suitable for all 22,2 mm tubes with an inner diameter of 12 mm or 18 mm (both sizes of bushings are included in the delivery). The cost amounts to EUR 24,90 incl. VAT per pair.
