Accessories for the Harley-Davidson Low Rider ST

D-Breisach, 25th May 2023 The Low Rider ST is one of the sporty touring models within the Milwaukee world. German manufacturer WUNDERKIND-Custom took the new edition of 2022 as an opportunity to expand its range of accessories, once again.

For the handlebar area, the custom parts specialist now offers individually adjustable brake and clutch levers, grips with a vibration-reducing rubber as well as smart handlebar mirrors with replaceable scratch protective device. The discreet LED indicators for the front are certainly an enrichment, offering a slim solution to the large original turn signals. Adapted to the design of the mirrors and levers, they ideally complement the front view in a harmonious look.

There is also more visual appeal for the original footrest system. The accessory manufacturer offers beautifully shaped and grippy accessory footpegs for a replacement, matching the design of the grips. Motorcyclists who want more legroom can even replace the entire original footrest system with one of the German manufacturer; multi-adjustable and changes of the position of up to 300 mm further forward compared to the original, is also possible. The brake pedal and gear lever can also be adjusted. Moreover, the footrests are covered with a vibration-reducing and ribbed rubber which prevents the feet from slipping off in wet conditions.

Those who prefer another solution for the rear can swap the wide-mounted turn signals including indicators and upright number plate holder against the new alternative from WUNDERKIND-Custom which seems to fit fraternally with the course of the fender: A plain license plate holder, available in two different design versions. With integrated number plate lighting, LED brake/taillight and indicators. A matching rear reflector is offered as a supplement.

A design cover for the axis on the rear wheel and an elegant protective grid for the oil cooler round off the program. The latter is not only intended to enhance the engine area visually. It also serves to protect sensitive areas against stone chips. In summary, it can be said that the motorcycle not only looks more coherent after the conversion. It also offers more individual comfort thanks to the adjustable custom parts in the hand and foot area.

As usual, all accessories have been developed in-house, are manufactured from high-quality materials and tested internally to ensure the highest quality and safety standards. All custom parts comply with the German StVO or have a parts certificate. Further information: [WUNDERKIND-Custom.com](https://www.wunderkind-custom.com)

WUNDERKIND-Custom is a German premium brand of ABM that produces high-end accessories for motorcycles. It has been founded in 2013 by the family head and CEO Christian Mehlhorn. While in the beginning, the brand produced parts only for Harley-Davidson motorcycles it now contains also products for many common bike brands and custom bikes. All products are constructed, designed, manufactured and retailed under the umbrella of the well-known company ABM Fahrzeugtechnik GmbH in the south of Germany.

ABM Fahrzeugtechnik GmbH is a manufacturer of high-end accessories for sport and custom bikes. The company was founded in 1985 and named after the founder Arthur Berthold Munz. Since 2010, Christian Mehlhorn has been the managing director who is responsible for about twenty employees in the field of development, production, marketing and sales at the permanent business establishment in Breisach am Rhein, Germany. Meanwhile, the company has launched two brands: ABM ergonomic style & WUNDERKIND-Custom.
