Custom parts for the new Sportster S of Harley-Davidson

D-Breisach, 04th August 2022 With the new conversion parts for the Harley-Davidson Sportster S, manufacturer WUNDERKIND-Custom once again shows how the appearance of the motorbike can be significantly improved by a targeted replacement of just some parts.

Starting at the front, the replacement of the clunky, original indicators by the newly designed, simple LED turn signals 'littleOne' makes the front view more simpler and more integrated.

Those who do not like the look of the original footrest system can replace the footrests and pedals with attractive alternatives. The replacement footpegs from the accessory manufacturer are not only visually appealing. Thanks to their grippy rubber they reduce the risk that the feet slip off in wet conditions. The replacement pedal for the gear lever also serves its purpose: it is slightly longer than the original which makes it easier to operate the gear shift lever.

The original number plate holder including lighting can be replaced by a side-mounted, adjustable number plate holder with integrated LED lighting. This is available in two design versions. A discreet LED indicator/taillight combination for mounting on the rear mudguard is also available which really accentuates the already short rear end. A mounting kit with an attractive reflector allows the lights to be mounted centrally on the original mounting points. And for those who ride with a pillion seat, there is an LED indicator/rear light combination that was specially developed for mounting on the original splashguard.

In summary it can be said that the silhouette of the motorbike already appears much more coherent after the conversion with only a few accessories.

All WUNDERKIND-Custom parts are developed at the company's plant in southern Germany and comply with the German Road Traffic Licensing Regulations (StVZO) or have a parts certificate.

WUNDERKIND-Custom is a German premium brand of ABM that produces high-end accessories for motorcycles. It has been founded in 2013 by the family head and CEO Christian Mehlhorn. While in the beginning, the brand produced parts only for Harley-Davidson motorcycles it now contains also products for many common bike brands and custom bikes. All products are constructed, designed, manufactured and retailed under the umbrella of the well-known company ABM Fahrzeugtechnik GmbH in the south of Germany.

ABM Fahrzeugtechnik GmbH is a manufacturer of high-end accessories for sport and custom bikes. The company was founded in 1985 and named after the founder Arthur Berthold Munz. Since 2010, Christian Mehlhorn has been the managing director who is responsible for about twenty employees in the field of development, production, marketing and sales at the permanent business establishment in Breisach am Rhein, Germany. Meanwhile, the company has launched two brands: ABM ergonomic style & WUNDERKIND-Custom.
