ABM Vitpilen 401/701 conversion

D - Breisach, 25th July 2018 Prolific German parts and accessory designer and manufacturer ABM has developed a Superbike kit, replacing the original handlebar with a higher and slightly wider aluminium Superbike handlebar.

The kit contains a black anodised triple tree and all necessary small parts and installation instructions, and includes a parts certificate. The matching “butted” Booster handlebar is available separately in three different colours. In total the Superbike conversion gives a higher handlebar position of about 70 mm and is said to improve handling on both models.

ABM's sister company WUNDERKIND-Custom offer accessories including handlebar mirrors with EG operating certificate and a tachometer cover, which can be used with a special tape. A side licence plate holder allows a simple handling to the left side. Specially developed LED indicator units can be mounted on existing mounting points below the rear of the frame, so they can be integrated into the total picture of the motorcycle without disturbing.
