Further CUSTOM PARTS for Indian Scout Bobber models

D-Breisach, 29th Jan 2021 As the previous custom parts for the Indian Scout Bobber has been adopted so well, the southern German manufacturer WUNDERKIND-Custom added and developed further accessories.

Smart. Ergonomic. Noble. With the expansion of its range of custom parts for Indian Scout Bobber models, once again the German-based company demonstrates its ability to create a perfect, tailored-made custom bike only by replacing and optimizing various parts. *„Since 2019, we’ve been developing a wide range of parts for this popular motorcycle. Meanwhile, our customers can fall back to a selection of over 20 accessories to beautifying their motorcycle. Starting with discreet design improvements over optimizations in ergonomics up to a complete conversion which gives the bike an independent character. From our point of view there should be something suitable for every budget and taste,“* says CEO Christian Mehlhorn.

A noble cover was constructed for the unsightly exposed cables between the risers in the handlebar area. A shapely and CNC-milled cover for the drive belt now replaces the massive original component made of plastic. And fine covers for both brake fluid reservoirs set further accents.

The highlight from the product portfolio - the KIT rear fender conversion "NEWCHURCH THREE" - has been supplemented by a reduced version, now. This includes the Bobber seat known from the large KIT which is adjustable backwards by approx. 45 mm and which is approx. 40 mm wider. With the accompanying cover the seat also can be combined with the original rear fender of the Indian Scout Bobber. Thus, it creates a bobber style at a significantly lower cost.

Those, who previously had to replace the entire footrest system to get more legroom and a better ergonomics, can gather from a simple and effective solution, now: the new pre-laying for the original footrest system. It allows a pre-laying in two steps, either 40 or 60 mm. Both are included in one set. And for whom the look of the original footrest system does not seem quite coherent you can resort to new rests and pedals which refine the overall look.

Each part has been made in Germany, corresponds to the requirements of road approvals or has a homologation paper.

WUNDERKIND-Custom is a German premium brand of ABM that produces high-end accessories for motorcycles. It has been founded in 2013 by the family head and CEO Christian Mehlhorn. While in the beginning, the brand produced parts only for Harley-Davidson motorcycles it now contains also products for many common bike brands and custom bikes. All products are constructed, designed, manufactured and retailed under the umbrella of the well-known company ABM Fahrzeugtechnik GmbH in the south of Germany.

ABM Fahrzeugtechnik GmbH is a manufacturer of high-end accessories for sport and custom bikes. The company was founded in 1985 and named after the founder Arthur Berthold Munz. Since 2010, Christian Mehlhorn has been the managing director who is responsible for about twenty employees in the field of development, production, marketing and sales at the permanent business establishment in Breisach am Rhein, Germany. Meanwhile, the company has launched two brands: ABM ergonomic style & WUNDERKIND-Custom.
