Sportive relaxation: Superbike handlebar conversion KITS

D-Breisach, 29th Jan 2019 For numerous motorbike model types the German motorcycle accessory specialist ABM offers practical complete solutions for handlebar conversions.

ABM Fahrzeugtechnik GmbH has been taken care of improving the ergonomics of motorcycling for 30 years. The focus is particularly on the handlebar area: By using pre-assembled conversion kits and individual adjustment options for the individual accessories, an entire handlebar conversion should contribute to more comfort and safety when driving.

One of the core competencies of the South German manufacturer is the classical Superbike conversion. It ensures a more upright seating position for a relaxed and predictive driving. Moreover, a wider handlebar improves the handling of the motorcycle additionally, so that driving safety and driving dynamics increase equally.

To ensure that such a conversion with its large number of required parts does not become too complex, ABM supplies model-specific complete solutions. For numerous motorcycle models there are individual Superbike KITS which include all necessary cables, Bowden cables, cowling pads, brackets, etc. An enclosed manual allows an uncomplicated assembly, so that even versed screwdrivers profit from this offer.

All components of a KIT are made of high quality materials and tested and approved according to German safety standards. A partial report is included in the delivery. Depending on the model of the motorcycle the Superbike handlebar conversion kits are available from EUR 189.00 incl. VAT.
