Accessories for the new Harley-Davidson Nightster

D-Breisach, 5th May 2023 With its latest project, WUNDERKIND-Custom once again demonstrates its skill and passion for consistently working to enhance the appearance as well as the functionality of a motorbike when developing new accessories - this time using the new Harley-Davidson Nightster as an example.

A chic replacement pedal was made for the gearstick lever, which is much easier to operate than the original due to its length and shape. The footrests can also be replaced with beautifully shaped accessory footrests that have been adapted to the design of the pedals. The footrests are coated with a vibration-reducing rubber with a good grip, which ensures that the feet do not slip away even in wet conditions.

Those who wish a slim alternative to the protruding turn signals can replace the original parts with small and elegant LED turn signals from the accessory specialist. These can be easily inserted into the original struts and mounted at the existing attachment points. Their discreet size and classic design alone make a significant visual difference.

If this is not enough and you want a plain rear end, you can remove not only the original turn signals, but also the fender end retaining plate with number plate and lights, and then install the new parts from WUNDERKIND-Custom. The number plate is then attached by means of a filigree and adjustable, lateral number plate holder. An equally slim LED indicator/taillight combination is integrated into the existing fender struts by means of an attractively shaped adapter. Both result in the rear not only look slimmer but also more coherent. In addition, a rear reflector is offered which can be mounted with little effort on the original mounting points.

Plain covers for the fork tubes with integrated LED mini turn signals and chic design covers for the axis of the rear wheel round off the program.

As usual, all accessories have been developed in-house, are manufactured from high-quality materials and tested internally to ensure the highest quality and safety standards. All custom parts comply with the German StVO or have a parts certificate.

WUNDERKIND-Custom is a German premium brand of ABM that produces high-end accessories for motorcycles. It has been founded in 2013 by the family head and CEO Christian Mehlhorn. While in the beginning, the brand produced parts only for Harley-Davidson motorcycles it now contains also products for many common bike brands and custom bikes. All products are constructed, designed, manufactured and retailed under the umbrella of the well-known company ABM Fahrzeugtechnik GmbH in the south of Germany.

ABM Fahrzeugtechnik GmbH is a manufacturer of high-end accessories for sport and custom bikes. The company was founded in 1985 and named after the founder Arthur Berthold Munz. Since 2010, Christian Mehlhorn has been the managing director who is responsible for about twenty employees in the field of development, production, marketing and sales at the permanent business establishment in Breisach am Rhein, Germany. Meanwhile, the company has launched two brands: ABM ergonomic style & WUNDERKIND-Custom.
