Accessories for Indian Challenger

D-Breisach, 27th June 2023 Indian's new Challenger already offers plenty of comfort from the factory. But to crown the luxury tourer, premium manufacturer WUNDERKIND-Custom has developed a few new accessories for this model.

In the handlebar area, there are individually adjustable brake and clutch levers, grips with vibration-reducing rubber and handlebar mirrors with replaceable scratch guards. The cover for the front brake assembly has also been replaced with an attractive design. This was constructed in the same design as the cover for the foot brake cylinder, as well as matching the levers and mirrors.

There is also more visual appeal for the original footrest system: replacement pedals were made for the gearshift and foot brake lever which cut a good figure not only because of their coordinated design. Due to their length they are also much easier to operate than the originals. The pillion pegs can also be replaced with those from the southern German manufacturer. They are coated with ribbed rubber so that they match the design of the grips. On the other hand, they prevent the feet from slipping off in wet conditions.

If a more comfortable seat with more legroom is important to the companion, a lowering kit including detents can be mounted on both sides to the existing mounting points of the pillion detents. This changes the position of the feet by about 90 mm forwards and about 60 mm downwards. The ends of the detents are supplied in the 'Crown' design, the same as it is available for the grips.

Those who wish a slimmer solution for the rear, they can swap the bulky turn signal/tail light combination, the lighting unit and the number plate holder for the new alternative from WUNDERKIND-Custom which blends harmoniously with the course of the fender: A plain licence plate holder in two different design versions which both coordinate with the design of the other parts. With integrated number plate illumination, LED brake/rear light and turn signals. A matching rear reflector is offered as a supplement.

As usual, all accessories have been developed in-house, manufactured from high-quality materials and tested internally to ensure the highest quality and safety standards. All custom parts comply with the German StVO or have a homologation paper.

WUNDERKIND-Custom is a German premium brand of ABM that produces high-end accessories for motorcycles. It has been founded in 2013 by the family head and CEO Christian Mehlhorn. While in the beginning, the brand produced parts only for Harley-Davidson motorcycles it now contains also products for many common bike brands and custom bikes. All products are constructed, designed, manufactured and retailed under the umbrella of the well-known company ABM Fahrzeugtechnik GmbH in the south of Germany.

ABM Fahrzeugtechnik GmbH is a manufacturer of high-end accessories for sport and custom bikes. The company was founded in 1985 and named after the founder Arthur Berthold Munz. Since 2010, Christian Mehlhorn has been the managing director who is responsible for about twenty employees in the field of development, production, marketing and sales at the permanent business establishment in Breisach am Rhein, Germany. Meanwhile, the company has launched two brands: ABM ergonomic style & WUNDERKIND-Custom.
