WUNDERKIND-Custom: New fluid reservoir

D-Breisach a. R. / 29th January 2019. At the beginning of the new season the specialist for high-quality motorcycle accessories will be presenting a fluid reservoir that has been specially developed for elegant custom motorcycles.

Season starter: WUNDERKIND-Custom presents a new fluid reservoir for hydraulic brake and clutch fittings as well as for mounting on the foot brake cylinder. The high-quality processed compensation tank has a 90 degrees angled hose connection which also rotates 360 degrees. Thus, it can be perfectly aligned. Moreover, the compensating reservoir has an universal holder which can be adapted individually to the installation site.

Milled from the whole piece the brake fluid reservoir has a capacity of 26 ml. It is shiny black anodized and has an inspection window which is made of glass. Due to the omission of eye-catching laser marking and wild milling contours this compensating reservoir appears in a reduced and plain design. Therefore, it integrates perfectly into the overall look of every custom bike without wanting to come to the fore.

The delivery contains an universal bracket, brake fluid hose and two hose clamps. The new compensation tank is available for EUR 69.90 incl. VAT. The ABE is in preparation.
