Custom parts for Harley-Davidson Touring models

D-Breisach, 3rd August 2023 The Grand American Touring models of the Milwaukee world already offer lots of comfort due to their plenty of equipment. However, a few original parts were a thorn in the side of the German accessories specialist: front and rear areas were to be visually upgraded and should look much more harmonious.

“Since we already have constructed many stylish and ergonomic accessories for other HD models, our engineers thought ahead and then have developed further custom parts for various touring models. With the replacement of just a few parts you can now give your motorcycle a look that with style clearly breaks away from the mainstream while also bringing some functional advantages with it”, says CEO Christian Mehlhorn.

For the handlebar area WUNDERKIND-Custom has developed individually adjustable brake and clutch levers, grips with vibration-reducing rubber and handlebar mirrors with replaceable scratch guards. The discreet LED turn signals for the front, which prove to be a slim solution to the bulky original turn signals, are certainly an enrichment, too. Adapted to the design of mirrors and levers, they ideally complete the front with a harmonious look.

There is also more visual appeal for the rear. Those who wish a slimmer solution from the same mold can change the slightly above 3-in-1-combination with the number plate holder against the new alternative from the accessory forge which blends harmoniously with the course of the fender and which coordinates with the design of the front parts: A plain license plate holder in two different design versions. With integrated number plate illumination, LED brake/rear light and turn signals. A matching rear reflector is offered as a supplement.

As usual, all accessories have been developed in-house, manufactured from high-quality materials and tested internally to ensure the highest quality and safety standards. All custom parts comply with the German StVO or have a homologation paper and are compatible for a wide range of motorbike categories of the same model family.

WUNDERKIND-Custom is a German premium brand of ABM that produces high-end accessories for motorcycles. It has been founded in 2013 by the family head and CEO Christian Mehlhorn. While in the beginning, the brand produced parts only for Harley-Davidson motorcycles it now contains also products for many common bike brands and custom bikes. All products are constructed, designed, manufactured and retailed under the umbrella of the well-known company ABM Fahrzeugtechnik GmbH in the south of Germany.

ABM Fahrzeugtechnik GmbH is a manufacturer of high-end accessories for sport and custom bikes. The company was founded in 1985 and named after the founder Arthur Berthold Munz. Since 2010, Christian Mehlhorn has been the managing director who is responsible for about twenty employees in the field of development, production, marketing and sales at the permanent business establishment in Breisach am Rhein, Germany. Meanwhile, the company has launched two brands: ABM ergonomic style & WUNDERKIND-Custom.
