### Triumph Rocket 3 models | First accessories are ready

***D-Breisach, 28th May 2020*** The German manufacturer of motorcycle accessories – WUNDERKIND-Custom - has now completed the first custom parts for the Triumph Rocket 3.

First, shapely alternatives for the original, fat license plate holder has been created which clears out the rear significantly and frees it from unnecessary ballast. There are different versions to choose: Either a side-mounted license plate holder version. Or a slightly slimmer version for the middle. With the latter it is also possible to mount the license plate holder with or without the original splash guard.

For all versions WUNDERKIND-Custom has already developed the matching LED indicator solutions – to mount at the license plate frame or at the rear. In case of positioning the indicators under the rear even with LED units from Kellermann®.

All parts have a homologation paper and are E-marked.

More parts will follow in the upcoming weeks. By the end of June, the complete collection of new accessories for Triumph Rocket 3 models should be ready.
