

PRESS INFORMATION

Beautify beautiful.

D-Breisach, 15th July 2021 With passion and imagination, the creative minds of TWINTON® have recently developed themselves to a congenial designer forge. Thus, new conversion parts are created which perfectly combine classic and modern and therefore, make a beautiful motorcycle even more unique. As in this case the Triumph Bonneville Bobber.

With the TWINTON® 7" headlight it is possible to integrate the original speedometer in the housing of the headlight. This is simply done by mounting it on fixed bracket points. This makes the front look tidier, the headlight and the speedometer become a beautiful unit. The headlight is available with H4 bulb or with a modern LED technology. The latter is suitable for customizers who prefer a modern light. For all others, the oldschool lighting with classic H4 insert is available.

As a different lamp arm is required for mounting the headlight, TWINTON® has designed a suitable bracket, too. This convinces not only by simple design. It also makes the assembly at the fork tube very easy as it has due to its hinged clamp.

If you want to visually upgrade the side line of your Bobber, you can easily raise the original Triumph tank with the TWINTON® riser. The tank riser consists of an attachment set. Adjustment work on the tank is not necessary.

Also the original rear can be freed from clunky balast and replaced by a plain side license plate holder and a discreet LED taillight.

Der seitliche TWINTON® Kennzeichenhalter ist verstellbar und hat eine LED-Beleuchtung integriert. Das Nummernschild wird durch simples Einschieben in den Rahmen ohne Bohren montiert. Der eigens designte Haltearm mit TWINTON®-Logo fällt zudem positiv ins Auge.

The lateral TWINTON® license plate holder is adjustable and has an integrated LED lighting. The license plate is mounted very simple by sliding it into the frame without any drilling. And the special designed mounting arm with the TWINTON® logo is also an eye-catcher.

The massive large original taillight can be a thing of the past when it will be replaced by the fine TWINTON® LED rear light. It is easily attached to the original mounting points. A special accent is set by a small cover with the TWINTON® logo which is used to cover the lower hole on the fender and which is included in the delivery.

WUNDERKIND[®]

CUSTOM

All parts comply with the German StVZO or have a parts certificate.

So that these beautiful accessories find their way to the customizer, the premium accessories manufacturer WUNDERKIND-Custom takes care of production and sales. In short: TWINTON[®] has the ideas - WUNDERKIND-Custom makes them true.

WUNDERKIND-Custom is a German premium brand of ABM that produces high-end accessories for motorcycles. It has been founded in 2013 by the family head and CEO Christian Mehlhorn. While in the beginning, the brand produced parts only for Harley-Davidson motorcycles it now contains also products for many common bike brands and custom bikes. All products are constructed, designed, manufactured and retailed under the umbrella of the well-known company ABM Fahrzeugtechnik GmbH in the south of Germany.

ABM Fahrzeugtechnik GmbH is a manufacturer of high-end accessories for sport and custom bikes. The company was founded in 1985 and named after the founder Arthur Berthold Munz. Since 2010, Christian Mehlhorn has been the managing director who is responsible for about twenty employees in the field of development, production, marketing and sales at the permanent business establishment in Breisach am Rhein, Germany. Meanwhile, the company has launched two brands: ABM ergonomic style & WUNDERKIND-Custom.
